## RIS-Internship programme implementation

**Organisations apply via an online application form available on the website.** Applied and approved organisations will enter the open **database "Pool of organisations"**, providing all relevant information online, for the potential interns to explore.

**Students** will observe the **details of internship opportunities and submit their application for their selected host organisations.**

**Matchmaking of the students and organisations** will be made by the RIS Internship Consortium, following an agreed procedure.

## How to get involved in the programme?

Apply to the open calls on the webpage:

RIS INTERNSHIP

eit RawMaterials Connecting matters

Co-funded by the European Union

## RIS-Internship programme

*Sustainable and structured programme for master students from RIS countries and EIT RM-labelled programmes (**AMIR**, **EMERALD**, **SINREM** & **TIMREX**)*

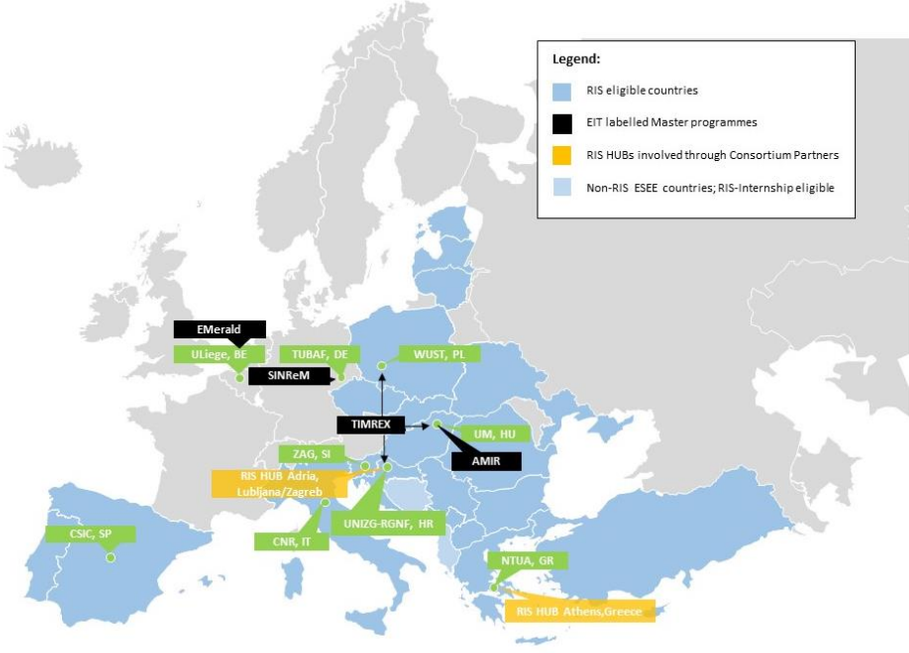

***EIT RawMaterials project connecting students and industry, creating opportunities for both!***

**Build your future and join the programme!**

## About

Overall objective of the project is to increase students' ***entrepreneurial and business skills, broadening the University-Business Cooperation activities in the RIS region, boosting the employment of the RM graduates within the hosting organizations and leveraging the regional brain drain.***

The territorial coverage includes the initial pilot region (Albania, Bosnia and Herzegovina, Croatia, Montenegro, North Macedonia, Serbia, Slovenia) and the newcoming East European RIS countries: Bulgaria, the Czech Republic, Estonia, Greece, Hungary, Latvia, Lithuania, Poland, Romania and Slovakia. Participants form Spain, Portugal and Italy are welcome as well!

## Opportunities for host organisations

*Are you lacking skilled workforce and looking for talented students?*

*Then, RIS-Internship is the perfect programme for your organisation!*

- Structured internship programme; involving best students with coverage of their internship fees
- Enhancing University - Business cooperation; familiarizing the future young professionals with real-life challenges
- Capacity building; structured programme for enhancing leadership & teamwork skills for mentors at the hosting organizations
- Matchmaking platform for students and host organizations

## Opportunities for students

*Are you looking for an internship position to improve your professional skills and enhance employment capacity?*

*Then, RIS-Internship is the perfect programme to build your future!*

- Structured internship programme; with coverage of internship fees (up to 800 €, depending on the country of internship)
- Pool of best host organisations from RIS region - offering 1-3 months internships
- Skills & Capacity building; structured programme for enhancement of professional skills through tackling real challenges
- Matchmaking platform for students to connect with a wide range of potential future employers

**Apply to the call on the webpage: https://www.ris-internship.eu/**

**Build your future and apply on open calls for students!**

The organisation needs to be active in economic, educational, research and/or other activities **primarily in mining, geo-sciences and geotechnology, extractive waste management, materials science, metallurgy and/or recycling.**
